

CLINICAL TRIALS INTELLIGENCE

ACCELERATE STRATEGIC CLINICAL TRIAL DEVELOPMENT DECISIONS

Cortellis™ Clinical Trials Intelligence is the most powerful resource to accelerate clinical trial development decisions and portfolio strategy.

Expertly curated clinical trials information is skillfully integrated with other scientific and competitive intelligence from Thomson Reuters.

So you can make the most informed decisions to direct your clinical strategies.

FAST ACCESS TO CRITICAL CLINICAL DATA

Cortellis Clinical Trials Intelligence includes fully searchable and indexed US and global clinical trial content for drugs, biologics, devices, and biomarkers.

Easily search for and analyze more than:

- 140,000 US and global trials
- 200,000 press releases indexed to clinical trial types or events
- 220,000 fully abstracted literature articles on clinical outcomes
- 2.25 million articles related to clinical development
- 21,000 meeting abstracts
- 8,000 comprehensive conference reports

FREE RESEARCH SERVICE

Our medically trained researchers can assist you with verifying clinical trial information found in Clinical Trials Intelligence.

INTUITIVE TECHNOLOGY FOR RAPID RESULTS

Find what you're looking for, the first time. Our best-in-class, iPad® compatible web portal has dozens of filtering options for enhanced searching.

Robust alerting and powerful exporting features mean everyone – from novices to experts – can find the right information to accelerate decisions.

- **Locate 'proof of concept' trials** - the first small patient trials with efficacy endpoints or efficacy biomarkers.
- **Find or analyze trials** by the drug intervention's drug class, mechanism of action, or technology.
- **Leverage powerful indexes** to explore disease therapy areas, actions & drug classes, when interventions go into a therapy area for the first time, patient segment and eligibility criteria, endpoints, biomarkers, combination therapies, trial designs, and adverse events.

DYNAMIC VISUAL ANALYTIC TOOLS

Reduce time spent compiling and analyzing clinical information. Dynamic visualizations in Cortellis give you new options for interacting with data – supporting evidence-based decisions in real-time.

- Visualizations show the distribution of indication, intervention, sponsor, phase, recruitment status, country design, and active control.
- Spotfire® visualization delivering insight into trial timelines. Visualizations can be easily saved in PowerPoint format so findings can be shared with senior management and updated easily.
- Our Professional Services team can customize analytics and reporting to meet your unique business challenges.

INFORMATION WHERE YOU NEED IT MOST

Access information in a way that suits how you and your organization work. Flexible delivery options from Cortellis mean you can find and use our clinical content anytime, anywhere.

- Easily integrate our content into other applications and platforms in real-time through a suite of APIs (Application Programming Interfaces)
- Incorporate your proprietary content and custom annotations with Thomson Reuters intelligence on the Cortellis platform through information integration services
