

**Jenna (Young Joo) Oh**  
**Consultant, Life Sciences**  
**Intellectual Property & Science (IP&Science)**

As Consultant for the IP & Science business of Thomson Reuters in ASEAN & North Asia, Jenna represents Thomson Reuters at conferences and exhibitions as a thought leader, and works closely with key opinion leaders in leading corporations and research organizations. She also supports the sales team in identifying new business leads and opportunities, and managing consulting services to the client.

Prior to joining Thomson Reuters, Jenna was Senior Researcher at KoreaBio Economy Research Center which is affiliated to Korea Biotechnology Industry Organization. She was responsible for publishing global strategy reports on Korean herbal medicine and global biopharmaceutical trends, and establishing a database of US, EU and China regulations for biosimilars approval. Jenna was also a member of the “Asia Healthcare Industry Initiative” task force.

Jenna holds two Master degrees in Immunology, one from Duke University, College of Medicine, and the other from Yonsei University, College of Medicine. She is the author of four published SCI papers and her research was primarily on inflammation-related diseases, infectious diseases and cancer. One of her key projects was the development of a novel drug for sepsis which was done in collaboration with one of Korea’s leading pharmaceutical companies.
